## **AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing Of Claims:**

## 1.-8. (Canceled)

9. (New) A device for activating an actuator system for protecting a pedestrian, the device being connected to an environment sensor system and a contact sensor system, the device comprising:

an arrangement for performing a first comparison of a first signal from the contact sensor system to a threshold; and

an arrangement for changing one of the threshold and the first signal as a function of a second signal of the environment sensor system, the actuator system being activated as a function of the comparing.

- 10. (New) The device as recited in Claim 9, further comprising:
  an arrangement for comparing the first signal to a noise threshold to ascertain a starting point for the first comparison.
- 11. (New) The device as recited in Claim 9, wherein the second signal includes a relative speed.
- 12. (New) The device as recited in Claim 10, further comprising:
  an arrangement for determining a starting point for the first comparison from a third signal of the environment sensor system.
- 13. (New) The device as recited in Claim 9, further comprising: an arrangement for changing the threshold as a function of time.
- 14. (New) The device as recited in Claim 12, further comprising:
  an arrangement for setting the noise threshold as a function of the third signal.
- 15. (New) The device as recited in Claim 9, further comprising: an arrangement for one of differentiating and integrating the first signal for comparison at least once.

NY01 1099450 v1 3

16. (New) The device as recited in Claim 9, wherein the first signal itself is used for the first comparison.
